THE COGNOS EFFECT - UNLEASHING ACTIONABLE INSIGHTS ON THE TOP 100 KDRAMAS OF 2023

1. INTRODUCTION

1.1 Overview

The project, "The Cognos Effect," aims to provide a concise and insightful analysis of the top 100 K-Dramas of 2023. The project utilizes data analytics and visualization techniques to present essential information about these K-Dramas, such as viewership, ratings, and social media buzz. It targets K-Drama enthusiasts who are looking for a quick yet comprehensive overview of the most popular and highly rated shows of the year.

1.2 Purpose

The purpose of this project is to offer a simplified and unique platform that empowers users to gain actionable insights into the top K-Dramas of 2023. By presenting key metrics in an easily understandable manner, the project aims to assist content creators, streaming platforms, and K-Drama enthusiasts in making informed decisions related to content strategy and consumption.

2. LITERATURE SURVEY

2.1 Existing Problem

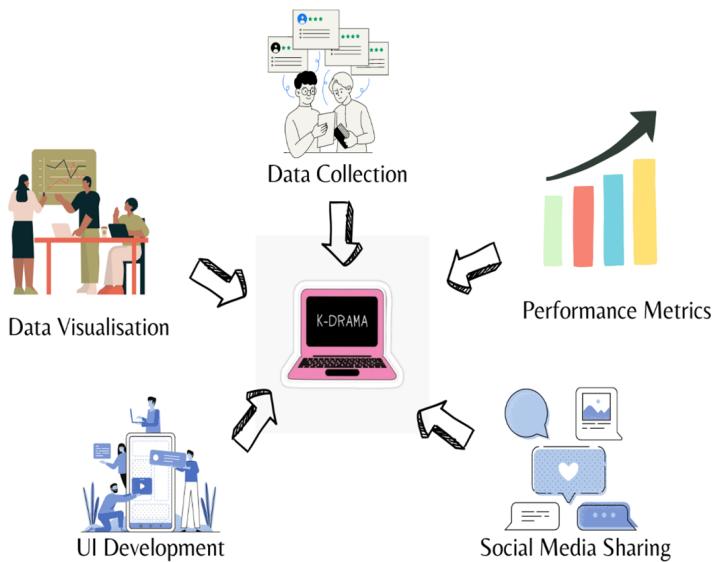

The entertainment industry, particularly the K-Drama market, lacks a consolidated and user-friendly platform to access concise yet meaningful insights about the top shows. Current approaches often provide overwhelming amounts of data, making it challenging for users to quickly identify trends and make informed choices.

2.2 Proposed Solution

"The Cognos Effect" proposes a novel solution by offering a streamlined analysis of the top 100 K-Dramas of 2023. It employs unique data visualization techniques to present information effectively and engages users with its user-friendly interface.

3. THEORETICAL ANALYSIS

3.1 Block Diagram

3.2 Hardware / Software Designing

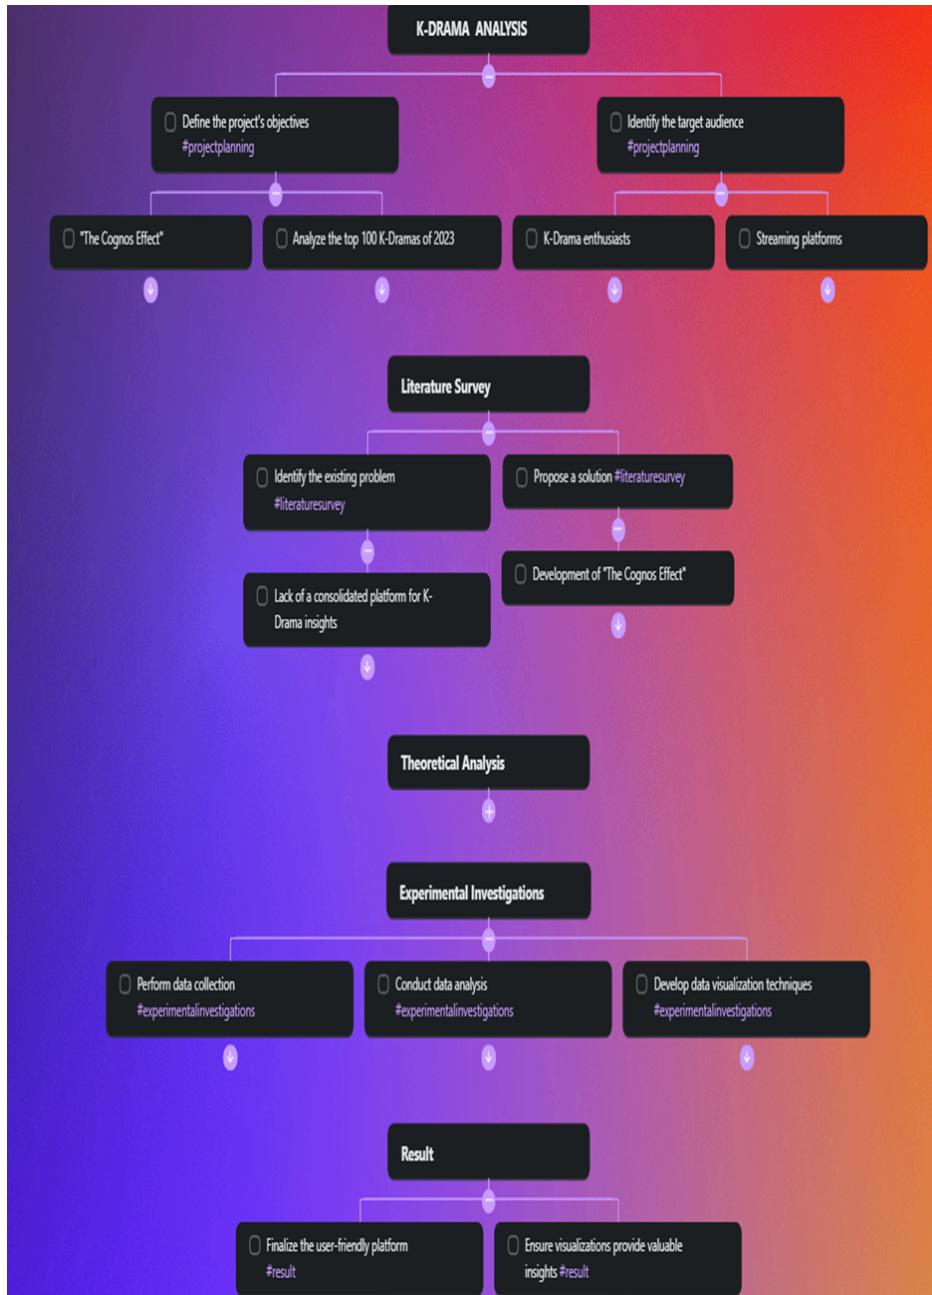

The project utilizes the following technology stack:

- IBM Cognos: For data analysis and visualization.
- Languages Used- HTML, CSS, JS.
- Python: For data processing and backend development.
- Web Framework (Flask or Django): For front-end development and user interface.

4. EXPERIMENTAL INVESTIGATIONS

During the project's development, various investigations were carried out, including data collection, analysis, and visualization techniques. Challenges related to data accuracy, visualization effectiveness, and user experience were addressed iteratively.

FLOWCHART

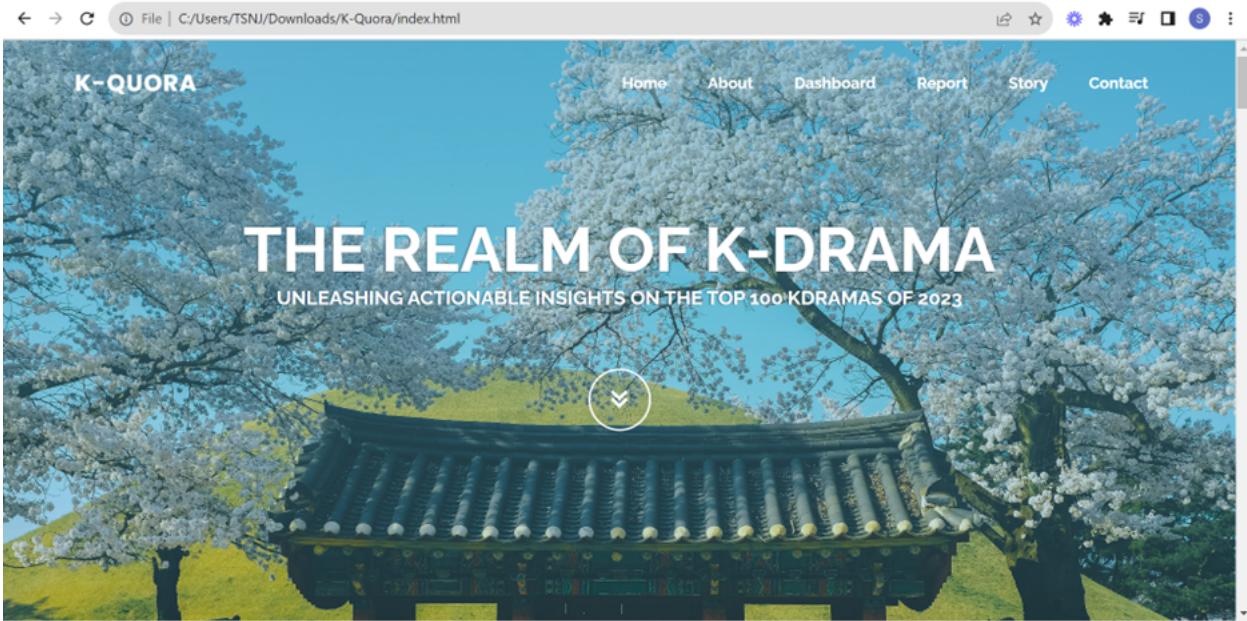

6. RESULT

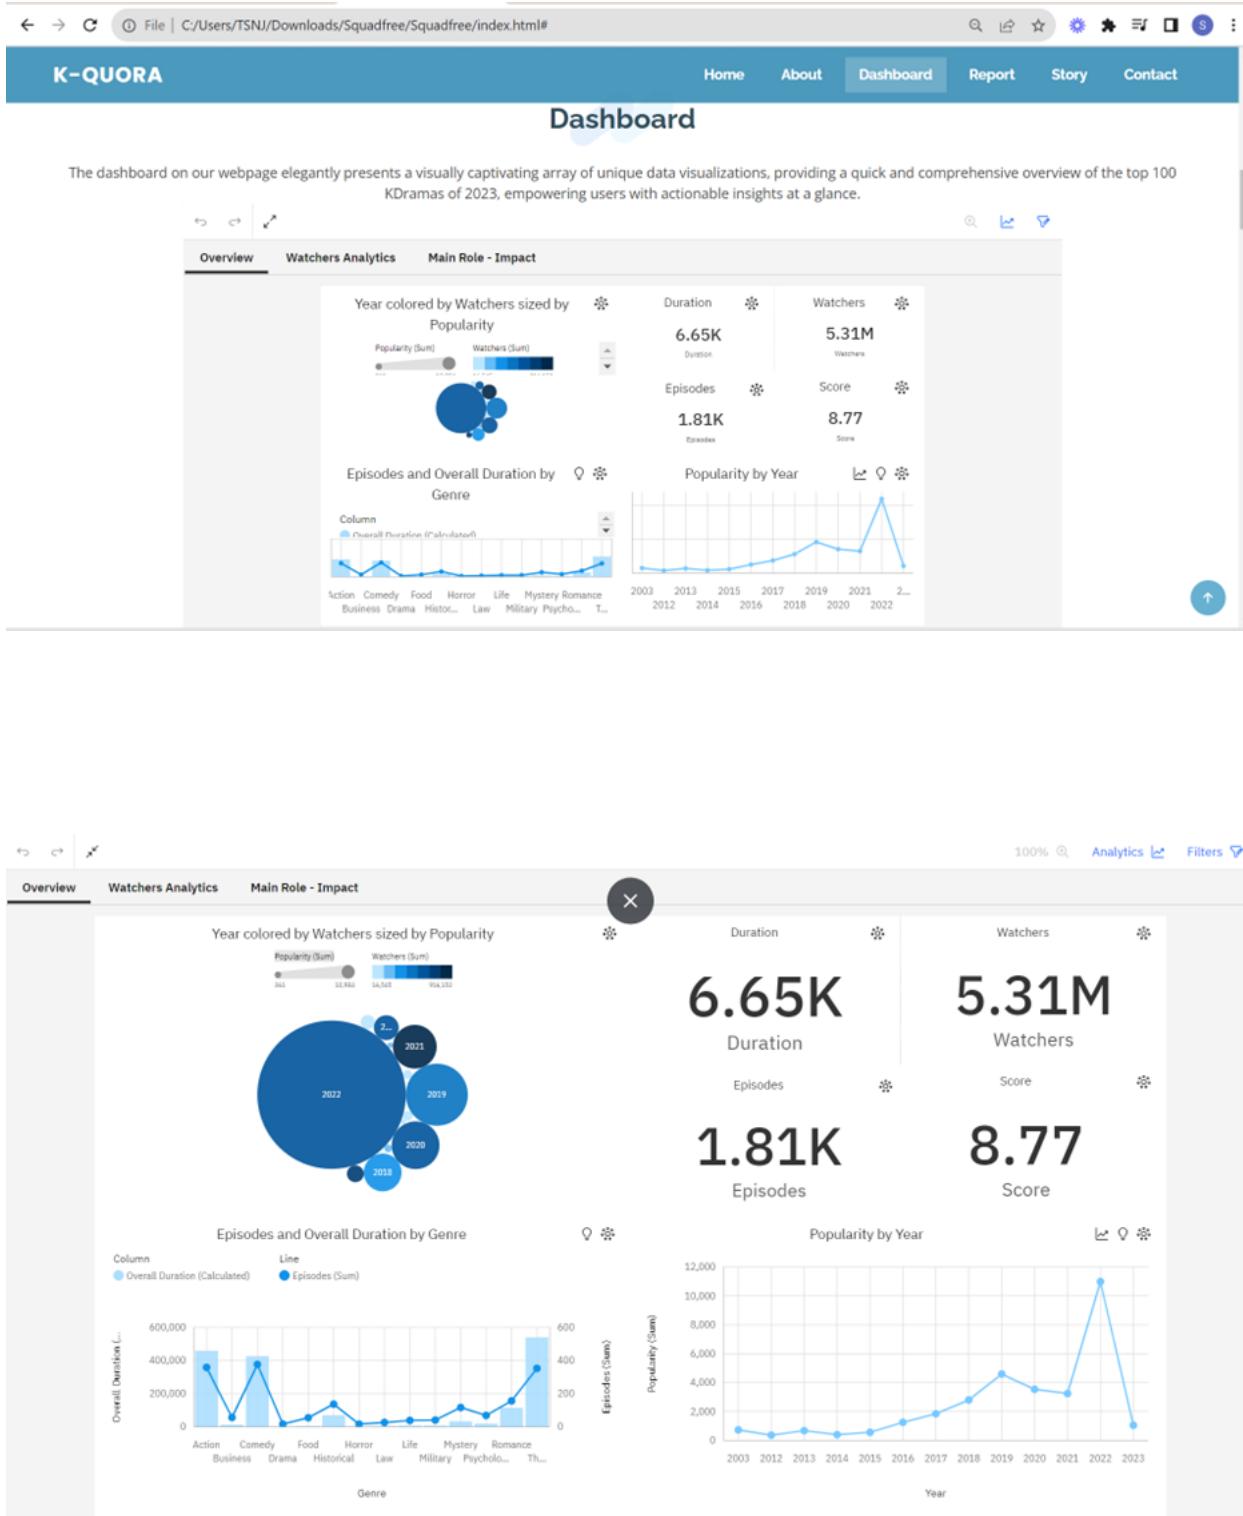

The final outcome of the project includes a user-friendly platform that offers concise and insightful analyses of the top 100 K-Dramas of 2023. The platform's

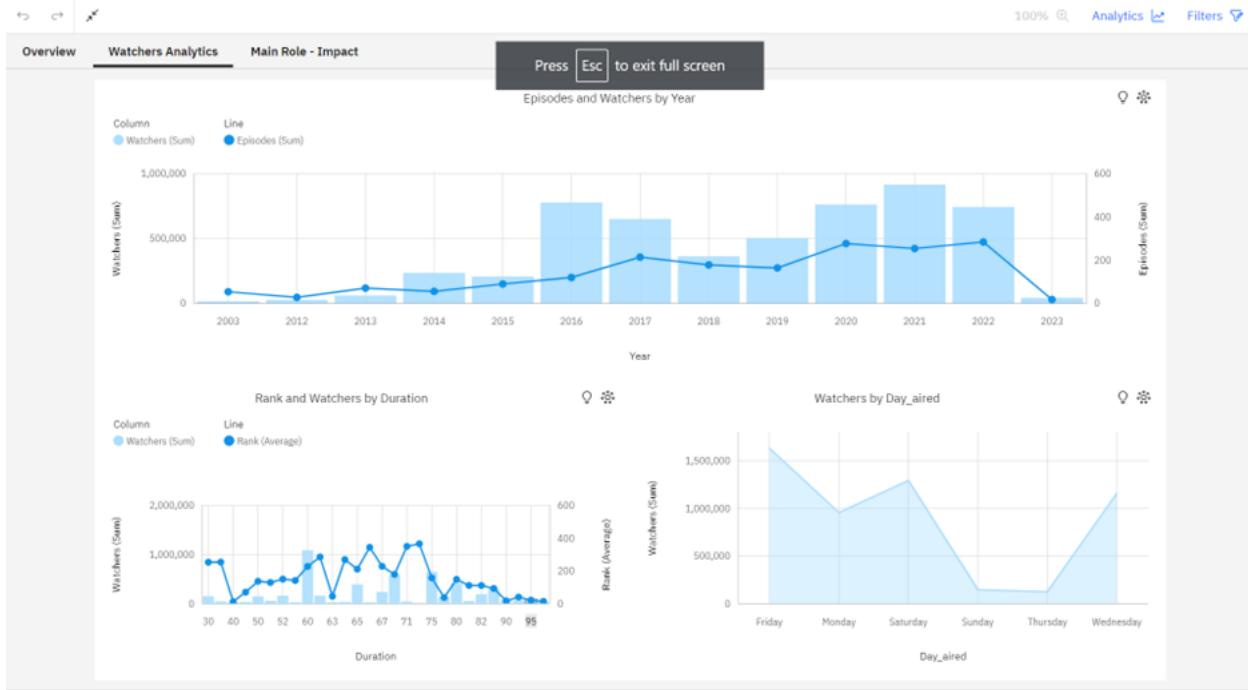

visualizations provide valuable insights into each K-Drama's performance, allowing users to make informed decisions about what to watch.

The screenshot shows the Visual Studio Code interface with the 'index.html' file open. The code is a single-page application (SPA) structure. It includes sections for 'About', 'Dashboard', 'Counts', and 'Cta'. The 'Counts' section contains three cards with data from a purecounter library. The 'Cta' section features a call-to-action button. The code uses Bootstrap's grid system and includes a header with a logo and navigation links.

This screenshot shows the same Visual Studio Code interface as the first one, but with several lines of code removed from the 'Counts' section. Lines 142 through 164 are missing, which include the first two card definitions. The remaining code follows the same structure, including the third card and the 'Cta' section.
